EXPERTISE

- Artificial Intelligence
- Computer Vision
- Backend Architecture
- Human-Computer Interaction
- Data Science
- Database Management

TECHNICAL KIT

- Python
- OpenCV
- MediaPipe
- PHP
- MySQL
- JavaScript
- HTML5 / CSS3
- Git & GitHub
- Git Bash

PROFESSIONAL PROFILE

Highly analytical, performance-driven Bachelor of Computer Applications (BCA) professional specializing in engineering intelligent production pipelines, computer vision systems, and robust backend models. Proven proficiency in synthesizing Human-Computer Interaction (HCI) frameworks with scalable engineering solutions that unify frontend delivery and deep analytical logic.

PROFESSIONAL EXPERIENCE

- Web-Based Application Development Intern** Karnataka, India
- Valcom IT Services Pvt Ltd**
- Engineered high-performance web applications, vastly elevating data flow processing and user engagement layout models.
 - Partnered systematically across multidisciplinary teams to design adaptive user architectures connected directly to advanced relational schemas.
 - Applied end-to-end software development life cycle (SDLC) models following standard enterprise development practices.

CORE RESEARCH & PROJECTS

- Face Control Human Interaction System (FCHI)** Core Research
- Developed a specialized AI computing framework configured to assist physically challenged individuals in utilizing personal computing systems cleanly without hand movements.
- Programmed deep computer vision processing models targeting facial landmarks and precise eye gesture parameters.
 - Translated system analytics in real-time to track custom cursor telemetry paths and immediate macro click inputs.

[Source Code: FACE-CONTROL-HUMAN-INTERACTION](#)

- Face Control Enterprise Website Portal** Deployment
- Engineered a responsive, high-speed portal to deploy administrative technical documentation, real-time user help logs, feedback processing databases, and multi-tier interface guidelines.

[Source Code: FACE-CONTROL-HUMAN-INTERACTION-WEBSITE](#)

- Production Web Architecture & Portfolio** Production Live
- Designed an advanced web portal incorporating cursor shadow tracing models, dark configuration elements, and smooth dynamic particle environments.

EDUCATION

Bachelor of Computer Applications (BCA)

In Progress

Specialized Focus Areas: Artificial Intelligence models, Complex Data Science pipelines, Advanced Data Mining techniques, RDBMS Schema management, and Core Software Engineering principles.
